4:40	Next Steps	Dana Reiding, FDOT
4:45	Adjourn	

**Global economic
competitiveness**

**Quality places to live,
learn, work, and play**

**Environment and
energy conservation**

A poster session is set up in the reception area and the ballroom. During the Long-Range Visioning Session, be sure to visit the students to hear about their research and meet the transportation planners and engineers of the future.

Throughout the Vision Zero Workshop and Long-Range Visioning Session, participants will have opportunities to interact with speakers and provide their input using Poll Everywhere software on their laptop or mobile device. This software functions best through the mobile app and can be downloaded at the iOS Store or Google Play store. It can also be accessed through your web browser at www.poll everywhere.com/login. You can access the poll using the link PollEv.com/VZLRV.

Lunch options are limited at the hotel but there are a wide range of options within short walking distance. Please visit Registration for recommendations.

We encourage all attendees to join an Amazing Race on the evening of May 6, 2019! Participants should choose a restaurant/location for dinner and try to incorporate as many different modes of transportation as possible on their way to and from dinner. Keep in mind, Jacksonville is home to the Skyway, a robust transit network, a ferry, multiple ridesharing providers, and an extensive bicycle and pedestrian network. On the morning of May 7, 2019, come prepared to report on the variety of modes of transportation selected to get to and from dinner.
