Potential Changes to FTP Objectives

Summary List

1. Eliminate transportation-related **fatalities and serious injuries**

2. Reduce the number of **crashes and other safety incidents** on the transportation system

3. Mitigate transportation-related **public health, safety, and security risks**

4. Improve **emergency response and recovery** times

5. Maintain Florida's transportation assets in a **state of good repair** for all modes

6. Meet customer expectations **for infrastructure quality and service**

7. Increase the **resilience** of infrastructure to risks

8. Improve transportation system **connectivity**

9. Increase **access** to jobs, education, health, recreation, and other services and goods for all residents, visitors, and businesses

10. Increase the **reliability** of people and freight trips

11. Increase the share of person trips not using **single occupancy vehicles**

12. Increase the number of **skilled workers** in Florida's transportation-related industries

13. Increase consistency between transportation investments and **regional and local plans and visions**

14. Improve transportation's impacts on **water, critical lands, and habitats**

15. Decrease transportation-related **air quality pollutants and greenhouse gas emissions**

16. Increase the **energy efficiency** of transportation

Crosswalk to Goals and Prior Language

Goal	2015 Objective	Updated Objective	Steering Committee Notes (July 2019 *with staff notes*)	Additional Staff Notes
Safety and security for residents, visitors, and businesses	• Prevent transportation-related fatalities and injuries • Reduce the number of crashes on the transportation system • Prevent and mitigate transportation-related security risks • Provide transportation infrastructure and services to help prepare for, respond to, and recover from emergencies	• Eliminate transportation-related fatalities and serious injuries • Reduce the number of crashes and other safety incidents on the transportation system • Mitigate transportation-related public health, safety, and security risks • Improve emergency response and recovery times	• More emphasis on technology (*address as strategy*) • More emphasis on data privacy and security (*address as strategy*) • Strengthen language on zero fatality vision	• Broadened definition of risks to include public health and safety • Adapted fourth objective to be more measurable
Agile, resilient, and quality transportation infrastructure	• Meet or exceed industry state, national, or international standards for infrastructure quality, condition, and performance for all modes of transportation • Optimize the functionality and efficiency of existing infrastructure and right of way • Adapt transportation infrastructure and technologies to meet changing customer needs • Increase the resilience of infrastructure to risks, including extreme weather and other environmental conditions	• Maintain Florida's transportation assets in a state of good repair for all modes • Meet customer expectations for infrastructure quality and service • Increase the resilience of infrastructure to risks • Improve transportation system connectivity	• Add references to being advanced, forward-thinking, sustainable, flexible (*mention in text*) • More emphasis on technology, funding (*address as strategy*) • Broaden view of infrastructure (e.g., broadband, charging stations, etc.) (*address in text and strategy*)	• Simplified first objective to reflect fiscal conditions and potential shifts in priorities • Deleted second objective from 2015; can be addressed in text/as strategy • Adapted third objective from 2015 to be more measurable • Connectivity emphasis is on closing system gaps, improving modal connections, and supporting technologies

FLORIDA
Transportation Plan

Goal	2015 Objective	Updated Objective	Steering Committee Notes (July 2019 *with staff notes*)	Additional Staff Notes
Connected, efficient, and reliable mobility for people and freight	• Reduce delays related to bottlenecks, gaps, crashes, and other incidents for all modes of Florida's transportation system • Increase the reliability of all modes of Florida's transportation system • Increase customer satisfaction with Florida's transportation system and regulatory processes for residents, visitors, and businesses • Increase the efficiency of the supply chain for freight moving to, from, and through Florida • Increase the efficiency and flexibility of transportation-related regulatory processes	• Increase the reliability of people and freight trips • Improve transportation system connectivity • Increase access to jobs, education, health, recreation, and other services and goods for all residents, visitors, and businesses	• Add reference to first/last mile (*address as a strategy*)	• Shifted emphasis from delay to reliability and related first objective from 2015, consistent with public input and federal performance management requirements • Deleted third objective from 2015; customer satisfaction with transportation system now addressed under infrastructure goal • Deleted fifth objective from 2015; discuss whether transportation regulatory processes remain a concern • Deleted freight/supply chain as separate objective; can be combined into others and addressed in text • Note in text that reducing safety/security events/risks also supports mobility • Connectivity emphasis on end-to-end trips including first/last mile • Access emphasis on moving both people and freight on end-to-end trips

Goal	2015 Objective	Updated Objective	Steering Committee Notes (July 2019 *with staff notes*)	Additional Staff Notes
Transportation choices that improve accessibility and equity	• Increase the use of new mobility options and technologies such as shared, automated, and connected vehicles • Increase the share of person trips using public transportation and other alternatives to the single occupancy vehicles • Increase the number of quality options for visitor travel to, from, and within Florida • Increase the number of quality options for moving freight to, from, and within Florida • Increase the efficiency and convenience of connecting between multiple modes of transportation	• Increase access to jobs, education, health, recreation, and other services and goods for all residents, visitors, and businesses • Increase the share of person trips not using single occupancy vehicles • Improve transportation system connectivity	• Add reference to accessibility to people of all ages and abilities • Add references to modal integration, equity	• Deleted first objective from 2015; text will define choices to include new mobility options/technologies • Combined objectives for visitors and freight into other objectives; discuss examples in text • Access emphasis on accommodating people of all ages and abilities and serving all communities including traditionally underserved • Connectivity emphasis on efficiency, convenience of connecting between modes
Transportation solutions that strengthen Florida's economy	• Provide transportation infrastructure and services to support job growth in transportation-dependent industries and clusters • Increase transportation connectivity between Florida's economic centers and regions • Increase transportation connectivity between Florida and global and national trading partners and visitor origin markets • Increase the number of skilled workers in Florida's transportation-related industries	• Increase access to jobs, education, health, recreation, and other services and goods for all residents, visitors, and businesses Increase access to jobs • Improve transportation system connectivity • Increase the number of skilled workers in Florida's transportation-related industries	• Add reference to innovation *(discuss in text)* • Consider adding reference to rural in objectives *(discuss in text)*	• Simplified objectives • Access emphasis on jobs/ economic development • Connectivity emphasis on economic centers and interregional (including urban to rural), interstate, and international connectivity

FLORIDA
Transportation Plan

Goal	2015 Objective	Updated Objective	Steering Committee Notes (July 2019 *with staff notes*)	Additional Staff Notes
Transportation solutions that enhance Florida's communities	• Plan and develop transportation systems that reflect regional and community values, visions, and needs • Increase customer satisfaction with Florida's transportation system • Provide convenient, efficient accessibility to the transportation system for Florida's resident and visitors • Provide transportation solutions that contribute to improved public health	• Increase consistency between transportation investments and regional and local plans and visions • Increase access to jobs, education, health, recreation, and other services and goods for all residents, visitors, and businesses	• Add stronger connection to land use • Add references to health equity, connectivity, access to recreation in objectives	• Revised first objective to be more measurable • Deleted second objective from 2015; customer satisfaction now addressed under infrastructure goal • Access emphasis on quality of life/community resources • Public health also addressed under safety goal
Transportation solutions that enhance Florida's environment	• Plan and develop transportation systems and facilities in a manner that protects, and, where feasible, restores the function and character of the natural environment and avoids or minimizes adverse environmental impacts • Decrease transportation-related air quality pollutants and greenhouse gas emissions • Increase the energy efficiency of transportation • Increase the diversity of transportation-related energy sources, with emphasis on cleaner and more efficient fuels	• Improve transportation's impacts on water, critical lands, and habitats • Decrease transportation-related air quality pollutants and greenhouse gas emissions • Increase the energy efficiency of transportation	• Consider changes to language related to energy sources and efficiency to be clearer about what is market driven • Consider strengthening reference to GHG • Strengthen reference to water	• Revised first objective to be more measurable • Deleted fourth objective from 2015; can address energy sources in strategies or supporting text
